

KAI USHER

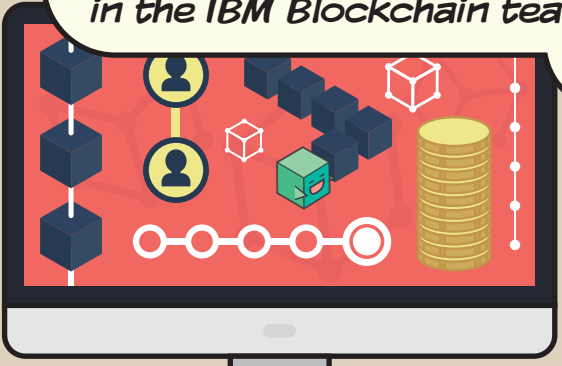

in the adventures at

IBM

IBM is a global cloud platform and cognitive solutions company which serves over 170 countries.

I was a software developer in the IBM Blockchain team.

I had a lot of variety over the year...

My core-role involved writing code to implement new Features, fix bugs and add enhancements to the product.

functionality improvement

EASE OF USE 😊

focus on accessibility

HIGH PRIORITY

I took part in design thinking and research workshops to discover how to improve and shape the product.

```
when up key pressed  
if y < 90  
change y by 15
```

I volunteered on Giveback events such as XploreIT.

I gained countless skills over the last year...

PROBLEM SOLVING
